

Assessment Test: Software Tester (QA)

Duration: 01:15 Hrs

Full Name:	Aditya Chaudhary
Email ID:	chaudharyaadi1149@gmail.com
Contact Number:	8439609170

You are testing a **Task Management Application** with the following features:

- User **Registration & Login**
- Logged-in users can:
 - Create a task
 - View task list
 - Edit a task
 - Delete a task
- Tasks are stored in a database and displayed in a list

Assume the application is **close to production release** and has **no existing test documentation**.

Test Case Design

Write **test scenarios and test cases** for:

- Registration
- Login
- Task CRUD operations
- Input validation & error handling

Include **positive, negative, and edge cases**.

Bug Identification

List **8-10 potential bugs or risk areas** without executing the application. For each bug, mention:

- Bug description
- Severity (Critical / Major / Minor)
- Reason/Impact

Note

- You are **not expected to complete everything perfectly**.
- We evaluate **how you think, structure, and explain**, not just what you write.

1 Test Case Design

1.1 Registration

- Verify if user can successfully register on the Application.
- Verify Credentials.
- Check for duplicate credentials.
- Verify registration with previously registered user.
- Verify email format.
- Check for repetitive registration attempts.
- Verify authentication. Check if user is receiving authentication code.
- Verify multiple authentication requests.
- Check for SQL injection.

1.1.1 Test Cases

- Use Special characters and escape characters in username, email or phone number fields.
- Register using empty credentials.
- Enter credentials length up to allowed character limit.
- Enter credentials length more than the allowed character limit.
- Use only special characters.
- Use alphabets with special characters mixed in.
- Enter escape codes in the credentials field.
- Try SQL injection through SQL queries.

1.2 Login

- Verify if user can login on the Application.
- Check login response time.
- Verify auto-login through cookies.
- Check if authentication works within expected response time.
- Check for SQL injection.

1.2.1 Test Cases

- Use Special characters and escape characters in username, email or phone number fields.
- Register using empty credentials.
- Enter credentials length up to allowed character limit.
- Enter credentials length more than the allowed character limit.
- Use only special characters.
- Use alphabets with special characters mixed in.
- Enter escape codes in the credentials field.
- Try SQL injection through SQL queries.

1.3 Task CRUD operations

- Create large amount of tasks within small amount of time.
- Create tasks with various
